THE SPEAKER

Flora  
VERSYCK

Educator & Clinical Specialist

Flora Versyck, qualified as an Orthotist Prosthetist from Thomas More University Belgium, and then continued her studies at Thim University of Applied Sciences Netherlands to become a qualified Physiotherapist. Flora is passionate about the combination of technical orthopaedics and physical therapy. Flora has accumulated many years' work experience within the rehabilitation sector.

About the webinars →

13 May  
12:30 - 13:30

## For Technicians

12:30 - 13:30 (Q&A until 2 PM)

### Optimising Orthosis Manufacture with Multi-Motion Contracture Management Joints

Join Allard UK in Collaboration with BASKO for an exclusive Live Webinar designed for Orthotic Technicians involved in the manufacture of Contracture Management Orthoses. This session will focus on the practical aspects of integrating Multi-Motion Dynamic Contracture Joints into your designs to enhance function and patient outcomes.

- **Understand** how Multi-Motion Joints work within contracture management.
- **Learn** best practices for fabrication and assembly.
- **Improve** the durability and effectiveness of orthoses through optimised techniques.

This webinar will provide valuable information to ensure your custom orthoses meet clinical needs efficiently and effectively.

25 June  
12:30 - 13:30

## For Clinicians

12:30 - 13:30 (Q&A until 2 PM)

### Effective Contracture Management with New Multi-Motion Joints

Allard UK and BASKO invite Orthotists and clinicians that prescribe contracture management joints to a live webinar that will focus on the clinical application of the new Multi-Motion Dynamic Contracture Joints. Discover how our joints enhance Low Load Prolonged Stretch (LLPS) treatment plans, offering a more effective and comfortable approach to managing correctable contractures.

- **Understand** why LLPS is a preferred method for increasing range of motion with minimal discomfort.
- **Explore** how to incorporate Multi-Motion Joints into multidisciplinary treatment plans
- **Learn** how to prescribe orthoses that optimize patient mobility and quality of life.
