

You're Invited!

Join us for the second in a series of Allard UK Educational Lunchtime Talks

Foot Drop & Carbon Fibre AFO's

Exploring the Role of Carbon Fibre in the Management of Foot Drop

Wednesday 28
October 2026

Online Via
Microsoft Teams

Duration
1 hour, start time 12:30

Join us for a clinically focused Lunchtime Talk exploring the management of foot drop and the role of carbon fibre AFOs in supporting gait and function.

During this session, we will focus on:

- ✓ Understanding foot drop and its impact on gait, stability and function
- ✓ Key clinical and biomechanical considerations when assessing a patient with foot drop
- ✓ The role of carbon fibre AFOs in managing foot drop and supporting gait
- ✓ How different AFO designs and characteristics can influence gait mechanics and functional outcomes
- ✓ Clinical considerations, patient selection and AFO choice
- ✓ Practical examples and clinical discussion

This session is aimed at Othotists, Physiotherapists, and other healthcare professionals working with patients with Foot Drop. There will be an opportunity for questions and clinical discussion.

Speaker

Vaidas Tony Andrejevas
HCPC registered Orthotist & Prosthetist with a strong background in gait lab analysis, neuro-orthotic care, and complex device prescription.
