Elements Body – Vest & Body

Elements Body Vest & Body Suit is a textile orthosis that provide continuous proprioceptive feedback over the trunk and upper body. The vest version may be particularly suitable when support is required for postural control and trunk stability, with the aim of improving posture and coordination in daily activities.

The Elements Body orthosis is made of Lycra elastic fabric and constructed from multiple panels in a design that provides pressure and resistance to enhance posture and stability. By increasing deep sensory input, also referred to as proprioception, fine motor skills as well as functional performance may also be improved.

The orthosis is ordered and manufactured according to individual measurements and is available with or without sleeves. Reinforcements and zippers can be added as needed for functional and usability needs. The design and configuration are determined by the prescribing clinician.

Advised minimum wearing time for Elements Body is 6 hours a day. At the beginning of treatment, Elements Body should be worn for shorter periods of time, and gradually increased until the goal of 6 hours per day is reached. The orthosis should not be used for more than 8–10 hours per day. Elements Body should not be worn through the night when patient is sleeping.

Recommended Range Of Application

Cerebral Palsy: hypotonia, spasticity, ataxia
MS, Stroke & Acquired Brain Injury: spasticity, ataxia
Muscular Dystrophy, Acquired Spinal Cord Injury and Down's Syndrome: hypotonia
Ataxia: spastic ataxia

Item No.	Model
393000000	Vest Without Sleeves
393060012	Body with ¾ sleeve
393010011	Vest With Short Sleeves
