

SELECTION® Thumb Rigid

Selection Rigid gives increased stability due to the non-elastic fabric around the thumb section. It keeps the thumb in a relaxed and pain free position. It is intended for mild to moderate arthritis in the first CMC-joint and protects the CMC-joint and the first MCP-joint.

Recommended Range Of Application

Rheumatic arthritis, after trauma, inflammtion, in case of hyper mobile thumb and wrist, after arthroplasty surgery and attritional wear.

Contraindications

None known.

Measurements

Wrist circumference
