Ryno Lacer® II wrist orthosis

Highly stable wrist and thumb orthosis with mouldable aluminium splints on the dorsal, volar, and radial sides. The radial thumb splint extends along the full length of the splint and effectively immobilises the thumb. Made from durable suede-like material with a breathable lining. The lacing locking system is easy to open and close with one hand. Ryno Lacer II is an updated and improved version of the Ryno Lacer, featuring enhanced palm padding, increased thumb cushioning, and an updated Velcro system on the underside of the orthosis.

Recommended Range Of Application

Post-traumatic, post-operative, rheumatologic conditions, and spasticity.

Measurements

Wrist circumference

Item No.	Model	Size	L/R	Color	Measurement
