NAVIGAIT™

NAVIGAIT™ is an ankle-foot orthosis designed for individuals with mild foot drop to help improve dorsiflexion. The padded plastic shell sits comfortably on the front of the lower leg and features removable, washable padding.
The amount of dorsiflexion can be adjusted through the position of the hook in the shoe lacing and by adjusting the upper strap. The low-profile design makes the orthosis discreet under trousers. NAVIGAIT™ is available in three sizes, and the plastic section can be trimmed slightly at both the upper and lower edges if required.

For barefoot use or use with sandals, NAVIGAIT 4-Foot is available as an accessory for attaching the NAVIGAIT™ orthosis. It is positioned around the forefoot and held securely in place by a combination of elastic and rigid materials, together with a silicone strip on the inside.

Recommended Range Of Application

Intended to support a foot when the ability to actively dorsifex is reduced due to conditions such as Stroke, Multiple Sclerosis, Post Polio Syndrome.

Contraindications

NAVIGAIT™ should not be used by individuals who present with spasticity or severe edema. NAVIGAIT™ does not address foot malalignment or deformities. If present, these should be managed with appropriate footwear and/or insoles as needed.

Measurements

Length of plastic section

Item No.	Model	Size	Measurement	L/R
284100010	NAVIGAIT	X-Small	23 cm	Bilateral
284100011	NAVIGAIT	Small/Medium	26,5 cm	Bilateral
284100013	NAVIGAIT	Large/X-Large	30 cm	Bilateral
284150011	4-foot	Small	21-23 cm	Bilateral
284150012	4-foot	Medium	23-26 cm	Bilateral
284150013	4-foot	Large	26-29 cm	Bilateral
284120010	Extra strap w/coil	X-Small	-	Bilateral
284120011	Extra strap w/coil	Small/Medium	-	Bilateral
284120013	Extra strap w/coil	Large/X-Large	-	Bilateral
