ToeOFF® 2.0

ToeOFF® 2.0 is an ankle-foot orthosis (AFO) for individuals with foot drop and mild to moderate proximal involvement. The orthosis is designed to provide support, improve toe-off and contribute to a smoother, more stable gait pattern. It is lightweight and has a low-profile design, making it discreet to wear under clothing. ToeOFF® 2.0 has a standard toe lift and a heel height of 12–15 mm, depending on size.

The MikroFix is pre-attached on the inside of the brace to accommodate a faster fitting procedure. It is also available with two different strap systems – With D-ring or without D-ring. Please note that the D-ring strapping system is not currently available in Ireland and the UK

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).
