CoverKIT™ 2.0

CoverKIT™ 2.0 is a smart padding solution for Allard AFO models ToeOFF® 2.0, ToeOFF Flow and BlueROCKER® 2.0. It is easy to put on and take off and provides a smooth, sleek surface that extends all the way down the strut to the footplate.
The inside corresponds to a SoftKIT™, and when additional pressure relief is needed, two vertical neoprene pads are included to create a pressure-free channel along the tibia. The original straps supplied with the orthosis can be used together with CoverKIT™ 2.0.

Item No.	Model	Size	Color	Calf circumference
