

# Boston Combi Soft (BCS)

The Boston Combi Soft brace is an anterior opening TLSO. The semi-rigid structure combines stability with the inner copolymer frame, outer high density thermofoam and comfort of the soft inner thermofoam. The brace is designed for patients that would require a more traditional rigid body jacket, but are unable to tolerate the hard plastic type brace.

### Recommended Range Of Application

Osteoporosis, Spondylolysis / Spondylolisthesis, Compression Fractures and Post-Op Surgery.

### Measurements

Available in 10 stock sizes with 15° Lordosis. Can be manufactured to cast or measurement. Please use our Universal Measurement Form for ordering customised braces which can be found in our download centre. Measurements in centimetres. Measurement 1: Hip; Measurement 2: Waist; Measurement 3: Chest

This product can also be made to scan (our new Boston Scan-to-Fit offering). Follow the protocol for scanning and the instruction video for the correct procedure. The information can be found under Support documents and Videos below.
