BlueROCKER® Short

BlueROCKER® Short is a specially designed ankle-foot orthosis (AFO) for individuals with foot drop. BlueROCKER® Short provides a high level of stability for moderate to severe ankle instability and moderate to severe proximal involvement. The orthosis is designed to provide support, improve toe-off and contribute to a smoother, more stable gait pattern.
BlueROCKER® Short is specifically developed for individuals with a shorter tibia and a wider foot at the metatarsal area, where standard models may not provide an optimal fit. Tibia padding should always be used for patient comfort. The orthosis has a heel height of 7 mm in all sizes, allowing it to accommodate shoes with a lower heel height.

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).

Item No.	Model	Size	L/R	Footplate Length	Height
289951011	BlueROCKER® Short	Small	Left	21,5 cm	29,5 cm
289951012	BlueROCKER® Short	Medium	Left	23,5 cm	32 cm
289951013	BlueROCKER® Short	Large	Left	25,5 cm	34 cm
289952011	BlueROCKER® Short	Small	Right	21,5 cm	29,5 cm
289952012	BlueROCKER® Short	Medium	Right	23,5 cm	32 cm
289952013	BlueROCKER® Short	Large	Right	25,5 cm	34 cm
